EDUCATION

Harvard University, Cambridge, MA. 2006
M.A. 2006, GPA 3.76. Ph.D. in international relations expected 2007. Focus on quantitative and computational methods. Teaching Fellow, Thesis Advisor, Workshop Coordinator, Research Assistant: statistical analysis, curriculum design, lecturing, grading, advising. Certificate of Distinction in teaching.

Yale University, New Haven, CT. 2001
B.A. in political science with distinction 2001, GPA 3.91. M.A., 2001, GPA 3.95. Summa Cum Laude. Phi Beta Kappa. Best International Relations Thesis Nominee. George W. Darr Memorial Scholar.

EXPERIENCE

National Science Foundation (NSF), Washington, DC. 2002-6
Graduate Research Fellow: statistics, economic methods, computational modeling.

National Bureau of Economic Research (NBER), Cambridge, MA. 2003-5
Economics of National Security Seminar member: wrote and published papers, using quantitative methods, on the economic implications of political risk.

Journal of Conflict Resolution, New Haven, CT. 2003-6
Peer reviewer: judged submissions for substantive contribution, quantitative methods, and theoretical integrity.

Atlantic Partnership, New York, NY. 2004-6
Young Leadership Committee-member.

Aacle, Inc., New York, NY. 2005-6
Principal: statistics, economic forecasting, consumer products, employee management.

Frontier Strategy Group, New York, NY. 2006
Analyst: political risk, emerging markets, metals, energy.

South End Press, Cambridge, MA. 1999
Author: wrote and published *No Trespassing: Squatting, Rent Strikes, and Land Struggles Worldwide*.

QUANTITATIVE AND ECONOMICS RESEARCH

“State Size and Social Movement Mobilization: A Cross-National Statistical Study,” Yale University, December 2000.

“State Failure: Full Bayesian Neural Network Predictions.” Harvard University, May 2002.

“A Replication of Cohen, Riolo, and Axelrod’s ‘Emergence of Social Organization in the Prisoner’s Dilemma,’” Harvard University, May 2002.

“Security as an Ordered Variable: the Underlying Continuous Relationship between War, Alliance, and International Organization.” Harvard University, December 2002.

“Geography, Power, and the Size of Nations: An Agent-Based Model of the International System.” Presented to the Harvard University Research Group on Statistical Methodology, October 2002.

“Deterrence of Nuclear Terror: A Negligence Doctrine.” *Non-Proliferation Review*, Spring 2005.

“The Ratchet Effect and System Unification: a Computer Simulation.” Presented at the Harvard Political Economy Workshop, December 2006.

“Catastrophic Externalities and International Trade: an Insurance Solution.” Harvard University, June 2006. Theory first published in *Houston Chronicle*, April 30, 2005.

Recommendations: President Lawrence Summers (Harvard), Economics Professor Alberto Alesina (Harvard), Economics Professor Martin Feldstein (Harvard), Government Professor Gary King (Harvard), Government Professor Bruce Russett (Yale).

Foreign Languages: French and Spanish (proficient), Chinese and Russian (beginner).

Computer Languages: Java, R, S, SPSS, Gauss, Excel, Mathematica (proficient).

Interests: Entrepreneurship, investing, contemporary art market, black and white large-format photography.
